Download
Kerbal Curseforge
Spacedock
also available in CKAN
MIT license
This mod add 7 parts:
Main cockpit, Gunner seat, Small windshield, Big windshield, Headrest, All-In-One module and Drone core
Basically this "cockpit" is just only external seat & MK1 size part
so all abilities and problems of external seat also exist
You can board from any side if Kerbal plays crash-dummy, without any "grab" and "board".
Kerbal sometimes can survive even if cockpit explode due hard landing
But you can't board Kerbal in seat at launch without other mods ("Take command" mod can do it.)
Also plate (one of Aero and Heat effects) and it have absolutely insaneeee
