CAUTION Before update from beta 0.9 delete all mod files (NESDparts folder inside GameData) Folder structure in mod changed and you possibly can have glitches !!!

This "cockpit" not a cockpit literally, it's just a external seat in MK-1 size part

Maybe i make it with internal space later

Mod include 6 parts

- Cockpit (open in "Aviation" stage)
- Small windscreen (open in "Aviation" stage)
- Big windscreen (open in "Aerodynamics" stage)
- Headrest (open in "Aerodynamics" stage)
- Drone core with small cargo bay
- Support module with reaction wheels battery and monopropellant

small windscreen and headrest is only decorative parts, but big windscreen have collision volume bigger than it's size and sometimes can protect pilot from reentry overheating (at some angles)

Current Version: 1.2.0 new part – Rear gunner seat KSP 130 – 144
