Relations

CAUTION

Before update from beta 0.9 delete all mod files (NESDparts folder inside GameData)

Folder structure in mod changed and you possibly can have glitches !!!

This "cockpit" not a cockpit literally, it's just a external seat in MK-1 size part

Maybe i make it with internal space later

Mod include 6 parts

- Cockpit (open in "Aviation" stage)
- Small windscreen (open in "Aviation" stage)
- Big windscreen (open in "Aerodynamics" stage)
- Headrest (open in "Aerodynamics" stage)

New parts: Drone core and Support module

Images: <http://imgur.com/a/ka5OW>

small windscreen and headrest is only decorative parts, but big windscreen

have collision volume bigger than it's size and sometimes can protect pilot

from reentry overheating (at some angles)

Current Version: 1.0

Hey man, i dont know how to thank you enough for updating the mod over 2 years after its last update. This was a great mod, simple and really helpful, but the update and new parts just turned it into one of the most helpful mods for me. Thank you.

Last I checked it worked with 1.7.x.

I'm testing with 1.8.x as well.

Is there a version of this mod for 1.7.3? If not, I would appreciate an update, if possible.
